

To whom it may concern,

I am writing to urge you NOT to limit the sale of biofuels within Australia to 5%.

If we raise the bar higher than the international standards, this may put some temporary economic pain on the country, however it will result in long term economic benefits as we will be ahead of the international market place and in a better position to pass on our technological advances to the rest of the world.

Please take a long term outlook to the decisions and policies you are implementing.
