

Discover Something?

Chances are you will...

Every day we are making exciting new discoveries about the breadth and depth of Australia's biodiversity. Since 2006, 48 reptiles, about 200 new fish and 1,184 flowering plant species have been discovered and documented. Yet we know only one quarter of our estimated biodiversity – there is much more still to be discovered!

The Australian Biological Resources Study (ABRS) offers **Capacity-Building Grants** for taxonomic and systematics research on Australian flora and fauna in the form of Honours, Masters and Ph.D. awards.

ABRS is also offering applicants beginning a **Ph.D. on an Australian Postgraduate Award (APA)** in 2011 the opportunity to top up the existing APA rate by \$10,000 per year.

Applications close 29 October 2010
