- Troughton, E. le G. (1965). *Furred animals of Australia*. Angus and Robertson : Sydney 8th edn xxxii 376 pp. 25 pls. (Members will be interested to hear of the recent publication of the 8th (Revised) edition of the standard work on the Australian mammals, Mr E. Le G. Troughton's "Furred Animals of Australia" (Angus and Robertson Ltd., Sydney). Our veteran member is to be congratulated on the appearance of this new edition and also the fact that his book has been a "best-seller" ever since the first edition appeared in 1941. The book enjoys a wide distribution among Australian country dwellers and there can be no doubt that the author's sympathetic approach has had a profoundly beneficial effect on country people's attitudes to the mammal fauna and its conservation. Ellis Troughton has provided the following note regarding some of the changes in this new edition: "During a recent tour overseas (1964–5), the collections of Australian mammals in the British Museum (Natural History), the Zoological Museum at Oslo, and various famous museums in the United States were studied with the most friendly co-operation of the respective curatorial staffs. The conclusions submitted in the author's recently published review of the pouched-mice of the genus *Sminthopsis* were confirmed, and the genus is now revised accordingly. The genus of broad-footed pouched-mice (*Antechinus*) and the rodent genus *Notomys* are also considerably revised. At the U. S. National Museum in Washington, the collection of mammals recorded by Curator David H. Johnson in the recently published report on the American-Australian Expedition

to Arnhem Land (Vol.4, 1964) were examined and all relevant alterations and additions have been included. Another important addition refers to the discovery in 1960 of the left half of the mandible of a thylacine at about 5,000 ft. in the Central Highlands of New Guinea, involving some profound speculation concerning the origin, radiation, and interchange of the marsupials during prehistoric connections across the Torresian shallows). General; Monotremes; Marsupials; Bats; Land Carnivores; Rodents;

Troughton, E. le G.(1967). *Furred animals of Australia*.
