Department of the Environment, Water, Heritage and the Arts 2009, *Assessment of Australia's Terrestrial Biodiversity 2008*, Report prepared by the Biodiversity Assessment Working Group of the National Land and Water Resources Audit for the Australian Government, Canberra.

### **Acknowledgements**

This report is the work of many people, including: the staff of the then National Land and Water Resources Audit, the Biodiversity Assessment Working Group comprising state and territory, Australian Government and scientific members, and Ms Penny Van Oosterzee. The Assessment was coordinated by Dr Kate Duggan from Griffin nrm, who was also lead author. Robert Kay compiled the spatial data and mapping. The team from Griffin nrm coordinated the case studies and carried out much of the background research.

A further list of contributors to this assessment is found in the Appendix.

| <b>Executive summary .....</b>  | <b>1</b>  |
| The objectives.....   | 1         |
| The framework.....  | 1         |
| The key findings .....  | 2         |
| Implications for future biodiversity assessments .....                                    | 8         |
| <b>1 Introduction.....</b>  | <b>10</b> |
| 1.1 Why assess biodiversity? .....  | 11        |
| 1.2 How do we assess biodiversity .....   | 11        |
| 1.3 The Assessment of Australia's Terrestrial Biodiversity 2008 .....                     | 13        |
| 1.3.1 Objectives .....  | 13        |
| 1.3.2 Structure of the Assessment .....   | 13        |
| 1.3.3 Case studies .....  | 14        |
| <b>2 Terrestrial ecosystems .....</b>   | <b>15</b> |
| 2.1 Key findings .....  | 16        |
| 2.2 Indicators .....  | 17        |
| 2.3 Native vegetation extent and condition.....   | 17        |
| 2.3.1 Native vegetation type and extent .....   | 18        |
| 2.3.2 Trends in native vegetation cover.....  | 19        |
| 2.3.3 Monitoring vegetation condition .....   | 28        |
| <b>3 Aquatic ecosystems .....</b>   | <b>41</b> |
| 3.1 Key findings .....  | 42        |
| 3.2 Indicators for assessing aquatic ecosystems .....                                     | 43        |
| 3.3 Rivers and wetlands .....   | 43        |
| 3.3.1 The extent and distribution of wetlands .....                                       | 45        |
| 3.3.2 Protected wetlands, rivers and catchments .....                                     | 47        |
| 3.4 River and wetland condition .....   | 54        |
| 3.4.1 The health of rivers and wetlands as a measure of biodiversity .....                | 55        |
| 3.4.2 Why are particular aquatic biodiversity indicators chosen? .....                    | 56        |
| 3.4.3 Trends in river and wetland health .....  | 65        |
| 3.4.4 Multi-jurisdictional collaboration to improve national reporting capabilities ..... | 74        |
| <b>4 Species and communities .....</b>  | <b>75</b> |
| 4.1 Key findings .....  | 76        |
| 4.2 Indicators .....  | 77        |
| 4.3 Threatened species and communities.....   | 78        |
| 4.3.1 National, state and territory lists.....  | 79        |
| 4.3.2 How much of Australia's biodiversity is threatened?.....                            | 79        |
| 4.3.3 Where is Australia's threatened biodiversity? .....                                 | 80        |
| 4.3.4 Interpreting the bioregional maps of threatened taxa .....                          | 93        |

## Case studies

|                 |  |     |
|-----------------|--|-----|
| Case study 2.1  | Queensland’s Regional Ecosystem survey and mapping program (Butler and Accad 2008) .....                               | 25  |
| Case study 2.2  | Mapping native vegetation condition in the Murray Catchment, New South Wales (CSIRO).....                              | 35  |
| Case study 2.3  | Land condition in rangelands and links to biodiversity (Fisher 2008) .....   | 37  |
| Case study 3.1  | Wetland mapping in Queensland (Butler 2008).....   | 48  |
| Case study 3.2  | Wetland ecosystem extent and condition in the south-east region of South Australia (Johnson 2008) .....                | 50  |
| Case study 3.3  | Monitoring of wetland extent and condition over time — Macquarie Marshes and coastal wetlands in NSW (DECCW 2008)..... | 52  |
| Case study 3.4  | Assessing river condition in Tasmania (Jansen 2008).....   | 59  |
| Case study 3.5  | Riparian vegetation condition assessment in Victoria (DSE 2008).....   | 60  |
| Case study 3.6  | Monitoring the condition of riparian zones in Australian tropical savannas (Fisher 2008).....                          | 61  |
| Case study 3.7  | Wetland ecosystem condition in Tasmania (d’Arville and Blackhall 2008).....  | 62  |
| Case study 3.8  | Sustainable Rivers Audit in the Murray-Darling Basin.....  | 66  |
| Case study 3.9  | Lake Eyre Basin - State of the Basin 2008: Rivers Assessment.....  | 69  |
| Case study 3.10 | Taking the pulse of south-east Queensland waterways—the Ecosystem Health and Monitoring Program (Guymer 2008) .....    | 73  |
| Case study 4.1  | The Tasmanian devil (Mooney et al 2008).....   | 113 |
| Case study 4.2  | Small mammals in northern Australia (Fisher and Woinarski 2008) .....  | 114 |
| Case study 4.3  | The Mallee emu-wren in South Australia (Cale 2008).....  | 117 |
| Case study 4.4  | The mountain pygmy possum (Vic DSE 2008).....  | 117 |
| Case study 4.5  | Review of New South Wales recovery planning (DECCW 2008a) .....  | 125 |
| Case study 4.6  | Aggregate processes and reporting on recovery planning and action in Victoria—ABC database (DSE 2008a).....            | 127 |
| Case study 5.1  | Will climate change affect Australian birds?.....  | 157 |
| Case study 5.2  | Impacts of climate change on the biodiversity of the Victorian alps (DSE 2008b).....                                   | 158 |
| Case study 5.3  | Sea level rise and biodiversity in the Coorong (Seaman 2008) .....   | 160 |
| Case study 5.4  | Predicting climate change impacts on World Heritage rainforests in south-east Queensland (Butler and Accad 2008).....  | 162 |
| Case study 5.5  | Monitoring the impact of climate change on biodiversity in Tasmania (Quinn and d’Arville 2008).....                    | 164 |
| Case study 5.6  | Community-level modelling of climate change impacts on biodiversity in New South Wales (DECCW 2008a) .....             | 165 |
| Case study 5.7  | The impacts of land clearing on vertebrate fauna in northern Australia (Fisher and Woinarski 2008) .....               | 170 |
| Case study 5.8  | The impacts of vegetation clearing on Queensland’s biodiversity and changes through time (Butler 2008a) .....          | 173 |
| Case study 5.9  | Eucalypt regeneration in agricultural landscapes in south-eastern Australia (DSE 2008b) .....                          | 174 |

|                 |   |     |
|-----------------|---|-----|
| Case study 5.10 | Impacts on biodiversity of <i>Mimosa pigra</i> in the Northern Territory (Fisher 2008a) .....                           | 177 |
| Case study 5.11 | Impacts of <i>Phytophthora cinnamomi</i> on biodiversity in southern Australia (Rudman and d'Arville 2008).....         | 179 |
| Case study 5.12 | <i>Phytophthora cinnamomi</i> in the eastern Stirling Range of Western Australia (Rudman and d'Arville 2008).....       | 180 |
| Case study 5.13 | Facial tumour disease in the Tasmanian devil ( <i>Sarcophilus harrisii</i> ) (Mooney et al 2008) .....                  | 181 |
| Case study 5.14 | Disease in Australian wildlife (Bigwood 2008) .....   | 182 |
| Case study 5.15 | Impacts of invasive species on soil invertebrates (Woodman et al 2008)  | 184 |
| Case study 5.16 | Threats from weeds in New South Wales (DECCW 2008b).....  | 185 |
| Case study 5.17 | Watering points in the Northern Territory (Fisher 2008b) .....  | 188 |
| Case study 5.18 | Impacts of grazing on biodiversity in Queensland (Butler 2008b).....  | 191 |
| Case study 5.19 | Impacts of grazing on biodiversity in temperate grasslands and grassy woodlands (DECCW and DNRE 2008c) .....            | 192 |
| Case study 5.20 | The Biodiversity in Grain and Graze project.....  | 194 |
| Case study 5.21 | Lack of fire threatens grassy ecosystems in the Bunya Mountains (Butler 2008c) .....                                    | 197 |
| Case study 5.22 | Monitoring the impacts of fire on biodiversity in tropical savannas (Fisher 2008c) .....                                | 199 |
| Case study 5.23 | Fire history in the semiarid landscapes of the Lake Johnston area, southern Western Australia (DEC 2008).....           | 200 |
| Case study 5.24 | Fire flora monitoring protocol in Victoria (DSE 2008a).....   | 202 |
| Case study 5.25 | The plight of the King Billy pine <i>Athrotaxis selaginoides</i> (Quinn & d'Arville 2008).....                          | 204 |
| Case study 5.26 | Malleefowl (SA with NSW and Vic) .....  | 208 |
| Case study 6.1  | Management of the threat posed by feral camels ( <i>Camelus dromedarius</i> ) (Edwards 2008) .....                      | 237 |
| Case study 6.2  | Bounceback—ecological recovery in the semiarid rangelands of South Australia (De Preu 2008) .....                       | 238 |
| Case study 6.3  | Victorian Ark fox control projects (DSE 2008b) .....  | 240 |
| Case study 6.4  | Western Shield recovery program (DEC 2008).....   | 242 |
| Case study 6.5  | Impact of fox predation on fledging success of little terns and other shorebirds in New South Wales (DECCW 2008b).....  | 245 |
| Case study 6.6  | Environmental water allocation and colonial breeding waterbirds on the Murray River (DSE 2008c) .....                   | 246 |
| Case study 6.7  | Managing the environmental impacts of weeds on public land in Victoria (DSE 2008d).....                                 | 247 |
| Case study 6.8  | National evaluation of impacts on biodiversity (Griffen NRM and URS Australia 2006) .....                               | 255 |
| Case study 6.9  | The development of BioMetric (DECCW 2008c) .....  | 258 |
| Case study 6.10 | Biodiversity Benefits project—methods for mapping on-ground vegetation enhancement activities (Zerger et al 2009) ..... | 260 |
