

Supplementary Form D:
Non-Commercial - Conservation Breeding or Propagation

This form should be completed if you ticked the 'Non-commercial - Conservation Breeding or Propagation' box in answer to the purpose of export/ import question in the Permit Application form. If so, please complete this form and return it, along with the Permit Application form, to the Department of the Environment, Water, Heritage & the Arts

Information on the requirements for approval of permits for the purpose of conservation breeding or propagation is available in the 'Guide to the Import and Export of Wildlife Specimens for Non-commercial Purposes' at www.environment.gov.au/biodiversity/trade-use/publications/noncommercial-guide/index.html

Applications that are incomplete or contain insufficient information cannot be assessed. Delays will occur whilst further information is sought from the applicant.

If there is insufficient space on this form to fully address any of the questions please attach additional pages.

1. Title of conservation breeding/propagation program

Form with three horizontal lines for text entry.

2. Have you previously received an import/export permit under Part 13A of the Environment Protection and Biodiversity Conservation Act 1999 for the same taxon?

No [] Go to next question

Yes [] Include previous import/export permit numbers below and go to next question

Form with two horizontal lines for text entry.

3. Is the import/export of the specimens covered by a co-operative conservation program approved by the Department?

The list of approved co-operative conservation programs is available at www.environment.gov.au/biodiversity/trade-use/sources/index.html

No [] A permit cannot be issued at this stage, but you may apply to have a program approved.

Information and application forms for applying for approval of a co-operative conservation program is available at http://www.environment.gov.au/biodiversity/trade-use/sources/non-commercial/ccp/index.html

Yes [] Name of co-operative conservation program

Form with two horizontal lines for text entry.

Go to next question

4. Is the specimen needed for conservation breeding or propagation by the exporting country?

No Include a statement on how it was determined that the exporting country does not require the specimens (if necessary on a separate page).

For example, relevant census or plan prepared by a regional zoological association (such as ARAZPA) does not list any institution in the exporting country as desiring the species for conservation breeding.

Go to next question

Yes ***Approval of your application will not be possible. (The regulations require that specimen is not needed for conservation breeding or propagation by the exporting country.)***

5. Is the application for the export of a live koala, platypus, wombat, Tasmanian devil or a species listed as threatened (excluding the Conservation Dependent category) under section 178 of the EPBC Act.

The list of EPBC threatened species is at <http://www.environment.gov.au/biodiversity/threatened/>

No **Go to question 8**

Yes The exporter, importer and the Department must enter into an agreement (Ambassador Agreement) about the treatment and disposal of the animal and any progeny of the animal.
Go to next question

6. Is there currently in place an Ambassador Agreement between the exporting and importing institutions and the Department relating to the species?

No **Go to next question**

Yes Include date agreement came into effect (date signed by the Department)

--

Go to question 8

7. Are the exporting and importing institutions prepared to enter into an Ambassador Agreement with each other and the Department for the species to be exhibited?

No **The issue of a permit will not be possible**

Yes Applicant should contact the Department, to get a copy of the standard Ambassador Agreement. The application can be submitted to the Department prior to the agreement being signed, but a permit cannot be issued until the Agreement has been signed by all Parties.

8. **Attach copies of any other approvals or permits relating to the specimens**

Include (where appropriate):
Ethics committee approvals
State/Territory holding, collection, import and export permits
CITES permits

9. Declaration

I declare that I/my organisation

- a) will ensure that the specimen or its progeny will only be removed from the co-operative conservation program in accordance with the program's objectives; and
- b) will not allow a specimen, used in the program, to be used for commercial purposes.
