

Appendix 3: Checklist of all macro-invertebrate taxa collected, upgraded according to information received up to December 22, 2004.

The field shown are Project/final CAAB-code (where no upgrades were available the Project CAAB-code was retained), final CAAB-code (searchable in the CAAB data base), ID-level (1:upgraded; 2:awaiting upgrade; 3:ship-board identification only), family, genus and species names, only for upgraded identifications: confidence level (CL) of identification, the estimated number of species represented by a taxon, new species to science, new record for New Zealand and Australia respectively.

17 pp
