Protected Species reporting for all Commonwealth Fisheries under the *Environmental Protection and Biodiversity Conservation Act, 1999* (amended January 2007)

Under the *Environmental Protection and Biodiversity Conservation (EPBC) Act (1999)* it is an offence for any person to undertake an activity in a Commonwealth area that results in the unintentional death, injury, trading, taking, keeping or moving of a species listed under the Act. However, the Act specifies certain actions are not offences, including actions authorised by a permit or undertaken in accordance with an accredited management plan or regime. Species listed under the Act fall into four main categories:

- a member of a listed threatened species or listed threatened ecological community,
- a member of a listed migratory species,
- a member of a listed marine species; or
- a cetacean.

All interactions with protected species, whether authorised or not, must be reported to the Department of the Environment and Water, Heritage and the Arts (DEWHA) within seven days. This requirement to report all interactions includes fishers operating in Commonwealth fisheries managed by the Australian Fisheries Management Authority (AFMA).

In 2005, a Memorandum of Understanding (MOU) between the Managing Director of AFMA and the Secretary of DEW was established. This MOU allows AFMA to report interactions with protected species (listed under the *EPBC Act*) in Commonwealth managed fisheries to DEW on behalf of fishers. An interaction is considered any physical contact an individual (person), boat or gear has with a protected species including catching and colliding with any of these species.

AFMA periodically provides summary reports of protected species interactions, by fishery and sub-fishery to DEWHA. The record of protected species interactions for AFMA managed fisheries as reported in fishery logbooks for the period **1 January to 31 March 2009** is given below. This record is compiled from official logbook records submitted to AFMA by fishers (concession holders); all concession holders have agreed to AFMA supplying this data to DEWHA on their behalf. Logbook data is not routinely verified and therefore AFMA cannot attest to the accuracy of this data nor authenticate that this data is a complete record of all interactions occurring in the mentioned fisheries.
