Dear Sir

RE: BANKSTOWN AIRPORT, NSW

We act as project managers on behalf of the Airport for the preparation of vacant unused land within the confines of landside.

The area subject to approval will be leased to a tenant, the works involve civil construction of 'cut and fill', drainage, fencing and landscaping of an area that had been previously filled.

It has come to our attention that two *Acacia pubescens* are within the area that is proposed for site preparation.

Attached is the following:

- Aerial photo of the proposed development area with the two trees identified
- Photo of the two trees growing out of previously filled area
- Landscape master plan for the restoration of the site
- Schedule of planting from the master plan
- Locality directory of proposed site

We would appreciate your consideration and approval to remove the two trees as part of the civil construction works proposed for the site.

We await your favourable approval.

Yours faithfully

Colin Carpenter
