

## Attachment: A – Question 3

### Description of Proposed Action

#### **A. The objectives and purposes of the action;**

*The proposed work involves the collection of seed from the identified areas for the rehabilitation and enhancement of Endangered Ecological Communities (EEC) within the Holsworthy Military Area, NSW. This work will result in additional habitat within the precinct as well as providing vegetation linkages to broader regional drylands and riparian corridors.*

#### **B. The equipment and methods used;**

*The proposed works involves the collection of seed using standard seed collection methods in accordance with 'best practise' guidelines. Team leader, Denise Black, is a highly experienced and skilled botanist. Seed will be collected with long handled pruners and by hand.*
