Property Name: ...Shirakami-Sanchi.....

PERIODIC REPORTING FOR WELL PLANNED HERITAGE PRESERVATION

Background

The twenty-ninth General Conference of UNESCO, held in 1997, decided to activate Article 29 of the World Heritage Convention concerning the submission of periodic reports on the state of implementation of the World Heritage Convention (Section I) and the State of Conservation of World Heritage properties (Section II). The national authorities are invited to report on Section I, while Section II shall be prepared for each property inscribed on the World Heritage list by the person(s) directly in charge of the property's management.

The periodic reports prepared by the States Parties will serve a three-fold purpose:

- ❖ to assess the current state of all World Heritage related issues in a State Party,
- ❖ to help focus the Committee's as well as the State Party's future activities and funds,
- ❖ to strengthen sub-regional and regional co-operation between States Parties.

The Periodic Reporting Questionnaire

In 1998, at its twenty-second session, the World Heritage Committee approved *Explanatory Notes*, designed to be read in conjunction with the *Periodic Reporting Format*, in order to outline the information expected to flow from the periodic reporting exercise. To facilitate the preparation of the report, a *Questionnaire* was developed that the States Parties are encouraged to use. It closely follows the subjects referred to in the *Explanatory Notes*, but in contrast to the latter splits the subjects up into short questions to be answered in a few sentences or paragraphs. A second type of question requires the indication of YES or NO by circling or underlining the appropriate answer. All questions are clearly identified with a little number in the right hand column of the *Questionnaire*. To make the reporting results meaningful every one of these questions has to be answered. If no answer is possible, the reasons should be given. If the available space is not sufficient for the answer, the response should be continued on a separate sheet of paper, clearly indicating the number of the question the text refers to (e.g. 006).

Benefits for the States Parties

The *Questionnaire* was developed in such a way as to allow to extract and compile or compare relevant information from different States Parties or properties, facilitating the process of preparing the regional synthesis report to be presented to the World Heritage Committee. The YES / NO questions make it possible to evaluate the reports quantitatively, but only the details that should be supplied in the related 'open question' make the answers meaningful and can be the basis for concerted actions to preserve a State Party's most valuable heritage for its transmission to future generations.

The information collected in this way will help the States Parties to assess their own strengths and weaknesses concerning the implementation of the World Heritage Convention, putting them in a position to (re)define policies and to request assistance in order to finance projects and / or training. On the other hand it allows the World Heritage Committee to collect information needed to devise *Regional Action Plans*, give well-informed advice to States Parties and to focus funds as well as attention on the region(s), States Parties and / or properties that need the collective support of the international community.

The preparation process of the regional periodic report will furthermore enhance regional co-operation through information meetings as well as through the better availability of regularly up-dated information on activities as well as contact addresses etc. The identification of the State Party's strengths makes it possible to exchange experiences and look for solutions to problems (e.g. of site conservation) within the region.

Conclusion

Periodic Reporting is a participatory exercise, aiming to collect information on World Heritage related issues on a national as well as on the property level. The individual State Party reports will be collated into a regional synthesis report to be presented to the World Heritage Committee. This information will enhance cooperation between the Committee and the States Parties and allow to focus funds and activities more efficiently, allowing the States Parties to protect their most valuable heritage more effectively for transmission to future generations.

WORLD HERITAGE CONVENTION
(FORMAT)**

SECTION II: STATE OF CONSERVATION OF SPECIFIC WORLD HERITAGE PROPERTIES

EXECUTIVE SUMMARY

II.1 Introduction

- a. State Party
- b. Name of World Heritage property
- c. Geographical coordinates to the nearest second
- d. Date of inscription on the World Heritage List
- e. Organization(s) or entity(ies) responsible for the preparation of the report
- f. Date of report
- g. Signature on behalf of State Party

II.2. Statement of significance

II.3. Statement of authenticity/integrity

II.4. Management

II.5. Factors affecting the property

II.6. Monitoring

II.7. Conclusions and recommended action

- a. Main conclusions regarding the state of the World Heritage values of the property (see items II.2. and II.3. above)
- b. Main conclusions regarding the management and factors affecting the property (see Items II.4 and II.5. above)
- c. Proposed future action/actions
- d. Responsible implementing agency/agencies
- e. Timeframe for implementation
- f. Needs for international assistance.

II.8. Assessment of the Periodic Reporting exercise for Section II

II.9. Documentation attached

II.2. Statement of significance

<p>At the time of inscribing a property on the World Heritage List, the World Heritage Committee indicates its outstanding universal value(s), or World Heritage value(s), by deciding on the criteria for which the property deserved to be included on the World Heritage List. Circle the criteria retained for the inscription:</p> <p>Cultural criteria: i – ii – iii – iv – v – vi Natural criteria: i – ii – iii – iv</p>	008
<p>Were new criteria added by re-nominating and/or extending the property after the original inscription? YES / NO</p>	009
<p>If YES, please explain:</p>	010
<p>Please quote observations concerning the property made by the Advisory Body(ies) during the evaluation of the nomination:</p> <p>(please see page 28)</p>	011
<p>Quote the decisions and observations / recommendations, if appropriate, made by the World Heritage Committee at the time of inscription and extension (if applicable):</p> <p>The Committee inscribed the site of the undisturbed pristine beech forest under criterion (ii) taking note that the Japanese authorities incorporated the original buffer zone in the site and a new map illustrating the revised boundaries. Progress on strengthening the legal basis and preparation of a management plan was also noted. The Committee noted the desirability of a follow-up mission to review progress in about three years.</p>	012
<p>Identify the actions taken as follow-up to these observations and/or decisions:</p> <p>July 1995: Official establishment of “Shirakami-sanchi World Heritage Area Liaison Committee”.</p> <p>November 1995: “Shirakami-sanchi World Heritage Area Management Plan” was formulated and implemented.</p> <p>October 1997: IUCN mission visited the site as a follow-up.</p>	013

II.3. Statement of authenticity / integrity

	<p>Have the World Heritage values identified above been maintained since the property's inscription? YES / NO</p> <p>If NO, please describe the changes and name the causes:</p>	021 022
	<p>What was the evaluation of the authenticity / integrity of the property at the time of inscription? (Please quote from the ICOMOS / IUCN evaluation):</p> <p>IUCN considers the legal basis adequate for this point in time but would encourage stronger protection be considered in future.</p> <p>As the area becomes better known and as a trail system is in place, there will be a need for a more practical operational presence, and the management plan is awaited. A specific management issue of some concern is the status of the Japanese black bear in the site, and a second issue will be the policies to be used to ensure that local traditional harvesting of plant products in the area is sustainable.</p>	023

<p>Wild areas in densely populated and long-inhabited Japan are rare occurrences. Even the national parks of Japan are subject to extractive uses and are often extensively developed. Shirakami's values are not its scenic and touristic appeal but are concerned with biological and scientific features, in a sense it has become valuable as other such areas have been almost totally converted by man.</p> <p>Although the nominated beech forests of Shirakami are not unique in Japan (there are many other stands in the country), the extent of its pristine forest without extrinsic developments does set it apart. Furthermore, the area is not fragmented; its circumference to area ratio is low; its shape is oval and it is surrounded by a succession of buffering areas. All of these contribute to good protected area design (with the exception of extending the site to incorporate the buffer).</p> <p>From a global perspective Shirakami is one of a number of remnant ancient forest blocks, in this case a monodominant Japanese beech forest. The ecosystem of which beech is the major species does, however, include other components such as bamboo, black woodpecker, serow and black bear among others, all interacting in a functional whole. The site is thus very important for studies on terrestrial cool-temperate ecology, particularly on eurasian beech forest system processes, and the monitoring of this particular biological community. It thus meets natural criterion (ii).</p>	011
<p>Nature Conservation Law</p> <p>Together with other laws aiming conservation of natural environment such as Natural Parks Law, the Law aims to promote the proper conservation of the natural environment in the area where conservation is essential, so that the nation can enjoy the blessings of natural environment and pass it to the future generation and thus contribute to secure the healthy and cultural life of the current and future nations.</p> <p>Natural Parks Law</p> <p>The Law aims to protect the scenic area as well as to promote the utilization and thus contribute to the health, recreation and enlightenment of the nation.</p> <p>Law on the Protection of Cultural Properties</p> <p>The Law aims to preserve the cultural properties as well as to promote the utilization and thus contribute to the improvement of the nation's standard of living and to progress of the World's culture.</p> <p>Guidelines for the establishment of Protected Reserve (Forest Ecosystem Reserve)</p> <p>The purpose is to maintain natural environment composed of forest ecosystem, protect flora and fauna, and preserve genetic resources by preserving natural forest of a fairly primordial state in National Forest.</p>	032
