CONVENTION

State of Conservation of specific World Heritage properties

State Party: ...JAPAN.....
Property Name: ...Yakushima.....

PERIODIC REPORTING FOR WELL PLANNED HERITAGE PRESERVATION

Background

The twenty-ninth General Conference of UNESCO, held in 1997, decided to activate Article 29 of the World Heritage Convention concerning the submission of periodic reports on the state of implementation of the World Heritage Convention (Section I) and the State of Conservation of World Heritage properties (Section II). The national authorities are invited to report on Section I, while Section II shall be prepared for each property inscribed on the World Heritage list by the person(s) directly in charge of the property's management.

The periodic reports prepared by the States Parties will serve a three-fold purpose:

- ❖ to assess the current state of all World Heritage related issues in a State Party,
- ❖ to help focus the Committee's as well as the State Party's future activities and funds,
- ❖ to strengthen sub-regional and regional co-operation between States Parties.

The Periodic Reporting Questionnaire

In 1998, at its twenty-second session, the World Heritage Committee approved *Explanatory Notes*, designed to be read in conjunction with the *Periodic Reporting Format*, in order to outline the information expected to flow from the periodic reporting exercise. To facilitate the preparation of the report, a *Questionnaire* was developed that the States Parties are encouraged to use. It closely follows the subjects referred to in the *Explanatory Notes*, but in contrast to the latter splits the subjects up into short questions to be answered in a few sentences or paragraphs. A second type of question requires the indication of YES or NO by circling or underlining the appropriate answer. All questions are clearly identified with a little number in the right hand column of the *Questionnaire*. To make the reporting results meaningful every one of these questions has to be answered. If no answer is possible, the reasons should be given. If the available space is not sufficient for the answer, the response should be continued on a separate sheet of paper, clearly indicating the number of the question the text refers to (e.g. 006).

Benefits for the States Parties

The *Questionnaire* was developed in such a way as to allow to extract and compile or compare relevant information from different States Parties or properties, facilitating the process of preparing the regional synthesis report to be presented to the World Heritage Committee. The YES / NO questions make it possible to evaluate the reports quantitatively, but only the details that should be supplied in the related 'open question' make the answers meaningful and can be the basis for concerted actions to preserve a State Party's most valuable heritage for its transmission to future generations.

The information collected in this way will help the States Parties to assess their own strengths and weaknesses concerning the implementation of the World Heritage Convention, putting them in a position to (re)define policies and to request assistance in order to finance projects and / or training. On the other hand it allows the World Heritage Committee to collect information needed to devise *Regional Action Plans*, give well-informed advice to States Parties and to focus funds as well as attention on the region(s), States Parties and / or properties that need the collective support of the international community.

The preparation process of the regional periodic report will furthermore enhance regional co-operation through information meetings as well as through the better availability of regularly up-dated information on activities as well as contact addresses etc. The identification of the State Party's strengths makes it possible to exchange experiences and look for solutions to problems (e.g. of site conservation) within the region.

Conclusion

Periodic Reporting is a participatory exercise, aiming to collect information on World Heritage related issues on a national as well as on the property level. The individual State Party reports will be collated into a regional synthesis report to be presented to the World Heritage Committee. This information will enhance cooperation between the Committee and the States Parties and allow to focus funds and activities more efficiently, allowing the States Parties to protect their most valuable heritage more effectively for transmission to future generations.

II.2. Statement of significance

<p>At the time of inscribing a property on the World Heritage List, the World Heritage Committee indicates its outstanding universal value(s), or World Heritage value(s), by deciding on the criteria for which the property deserved to be included on the World Heritage List. Circle the criteria retained for the inscription:</p> <p>Cultural criteria: i – ii – iii – iv – v – vi Natural criteria: i – ii – iii – iv</p> <p>Were new criteria added by re-nominating and/or extending the property after the original inscription? YES / NO</p> <p>If YES, please explain:</p>	<p>008</p> <p>009</p> <p>010</p>
<p>Please quote observations concerning the property made by the Advisory Body(ies) during the evaluation of the nomination:</p> <p>(please see page 28)</p>	<p>011</p>
<p>Quote the decisions and observations / recommendations, if appropriate, made by the World Heritage Committee at the time of inscription and extension (if applicable):</p> <p>The Committee inscribed the site under criteria (ii) and (iii) noting in particular the sacred values of the ancient forests of Yakusugi and took note of the statement by the Japanese authorities that a coordinating committee for the site had been established. The Committee endorsed the suggestion in the IUCN report concerning follow-up measures.</p>	<p>012</p>
<p>Identify the actions taken as follow-up to these observations and/or decisions:</p> <p>September 1995: Official establishment of “Yakushima World Heritage Area Liaison Committee”.</p> <p>November 1995: “Yakushima World Heritage Area Management Plan” was formulated and implemented.</p> <p>October 1997: IUCN mission visited the site as a follow-up.</p>	<p>013</p>

	<p>Is the State Party actively considering a revision of the property boundaries or the buffer zone? YES / NO</p>	019
	<p>If YES, indicate what is being done to that end:</p>	020

II.3. Statement of authenticity / integrity

	<p>Have the World Heritage values identified above been maintained since the property's inscription? YES / NO</p>	021
	<p>If NO, please describe the changes and name the causes:</p>	022
	<p>What was the evaluation of the authenticity / integrity of the property at the time of inscription? (Please quote from the ICOMOS / IUCN evaluation):</p> <p>The site has a complex sinuous boundary and clearly some World Heritage values (e.g. Some prime areas of old-growth forest and some scenic features and waterfalls) fall outside but adjacent to the nominated area.</p> <p>On the whole, the legal basis for protection of the site is sufficient. Although the vertical compartmentalization of conservation management provides a diversity of approaches, it is also complex and requires extra effort to ensure coordination among agencies. Also an overall management plan for the nominated site is required.</p>	023

Addition

	<p>Yakushima's values for which it is nominated are less for its appeal to mass tourism than for its biological, scientific and aesthetic significance. The presence of such a site on a small island is especially valuable particularly as it includes not only the high peaks of the central core but a salient which reaches down 2000m to the seacoast. Because of this phenomenon plus the fact that the nominated area contains the last, best example of an ecosystem dominated by the Japanese cedar in a superb scenic setting, the site meets natural criterion (iii).</p> <p>Moreover, Yakusima also meets criterion (ii) as it contains a unique remnant of a warm-temperate ancient forest which have been much reduced elsewhere in the region. These forests extend through an altitudinal sequence from broadleaved forest along the coast up through temperate coniferous at middle altitudes to a cold-temperate bamboo grassland at the central peaks. The site is very important for scientific studies on evolutionary biology, biogeography, vegetation succession, interaction of lowland and upland systems, hydrology and warm-temperate ecosystem processes. It is also meets the conditions of integrity for this criterion as a full representation of the different life-zones is included.</p>	011
