

Australian Government

Director of National Parks

Dear Park Visitor

Closure of Cave Beach Campground and Cave & Bherwerre Beaches for Weed Control Program, 27 May – 29 May 2009

The Commonwealth Department of the Environment, Water, Heritage and the Arts will be conducting its annual program of aerial spraying for the environmental weed 'bitou bush' from Wednesday 27 May to Friday 29 May 2009.

The program involves application by helicopter of ultra-low volume (3 litres of bioactive roundup in 30 litres of water/ha) herbicide. There are no known public health risks and the treatment is highly selective for the target weed.

Visitors to Booderee are advised that the Program will require closures of the Park including:

- Cave Beach and Cave Beach campground
- West of Cave Beach Road, including all of the Bherwerre Beach dune system south of Elmoos Road,

The areas of closure are outlined on the attached map. Signage will be posted to indicate the closure of these areas at the time of the operations.

For further information please call the National Park office on 02 4442 1006
