

Contents

Executive summary	iii
Acknowledgments	x
1 Introduction	1
2 Physical setting	3
2.1 Geomorphology/geology	3
2.2 The Tamar catchment	3
2.3 Meteorology	6
2.4 Tributaries	9
2.5 Estuarine circulation, tides and currents	10
2.6 Temperature, salinity and pH	10
2.7 Sediments	10
2.8 Aquatic vegetation	12
2.9 Macroinvertebrates, fish, birds and other fauna	12
2.10 Introduced species	13
3 Uses of the Tamar Estuary	17
3.1 Population centre	17
3.2 Recreation	17
3.3 Fishing and aquaculture	20
3.4 Marine transport	20
3.5 Industrial and sewage discharges	21
3.6 Nature reserves	21
4 Inputs to the Tamar Estuary	22
4.1 Sewage treatment plants	22
4.2 Industry	30
Comalco Aluminium (Bell Bay) Ltd.	30
Tasmanian Electro Metallurgical Company (TEMCO)	32
North Forest Products - Tamar Woodchip Mill	35
Boral Timber Tasmania Ltd. (Forest Resources)	36
Total industrial inputs	37
4.3 Urban run-off	37
4.4 Refuse disposal sites, industrial stockpiles and contaminated sites	40
4.5 Mines	44
4.6 Tributaries	47
4.7 Sediments	47
4.8 Atmospheric inputs	47
4.9 Spills	48
4.10 Summary	49
5 Previous studies and monitoring programs	53
6 Environmental quality of the Tamar Estuary	55
6.1 Dissolved oxygen	55
6.2 Suspended particulate matter and Secchi depth	58

6.3	Pathogens/bacteria	58
6.4	Nutrients	65
6.5	Chlorophyll <i>a</i> and phytoplankton	66
6.6	Inorganic toxicants	68
	Heavy metals	68
	Fluoride	80
6.7	Organic toxicants	80
	Hydrocarbons	80
	Polycyclic aromatic hydrocarbons (PAHs)	83
	Phenols	84
	Pesticides	85
7	Sedimentation and dredging	86
7.1	Siltation in the Tamar Estuary	86
7.2	Dredging	87
7.3	Remediation and prevention measures	91
8	Summary and recommendations	92
	Recommendations	94
9	References	98

Appendix A Glossary of terms
