|----------|------------------------------------------------------------------------------------------------------------------|-----------|
| <b>1</b> | <b>Introduction</b>                                                                                              | <b>1</b>  |
| <b>2</b> | <b>Overview description of the existing system</b>                                                               | <b>1</b>  |
| 2.1      | System process and layout description                                                                            | 1         |
| 2.2      | Design and operating philosophy                                                                                  | 2         |
| <b>3</b> | <b>Review of design</b>                                                                                          | <b>2</b>  |
| 3.1      | Original design                                                                                                  | 2         |
| 3.1.1    | Corridor design                                                                                                  | 3         |
| 3.1.2    | Tailings and process water pumping and piping system                                                             | 3         |
| 3.1.3    | Environmental                                                                                                    | 3         |
| 3.2      | Summary of changes since the original design and construction and additional details                             | 4         |
| 3.3      | Current suitability of key aspects and of the original design                                                    | 5         |
| <b>4</b> | <b>Review of existing system and current operating, maintenance and development regimes and responsibilities</b> | <b>6</b>  |
| 4.1      | Current inspection, operating, maintenance and development regimes and responsibilities                          | 6         |
| 4.2      | Pipe materials and condition/integrity                                                                           | 7         |
| 4.3      | Pipe support                                                                                                     | 9         |
| 4.4      | Pipe jointing                                                                                                    | 9         |
| 4.5      | Redundant pipework                                                                                               | 10        |
| 4.6      | Maintenance of the corridor                                                                                      | 10        |
| 4.7      | External threats                                                                                                 | 11        |
| 4.8      | Current developments                                                                                             | 12        |
| 4.9      | Environmental                                                                                                    | 12        |
| <b>5</b> | <b>Anticipated future developments</b>                                                                           | <b>12</b> |
| <b>6</b> | <b>Discussion and recommendations</b>                                                                            | <b>12</b> |
| 6.1      | Suitability of key aspects of the original design                                                                | 12        |
| 6.2      | Inspection, operating, maintenance and development regimes and responsibilities                                  | 13        |
| 6.3      | Pipe materials condition/integrity                                                                               | 13        |
| 6.4      | Pipes support                                                                                                    | 13        |

|                             |    |
|-----------------------------|----|
| 6.5 Pipe jointing           | 13 |
| 6.6 Redundant pipework      | 14 |
| 6.7 Maintenance of corridor | 14 |
| 6.8 External threats        | 14 |
| 6.9 Current developments    | 14 |
| 6.10 Environmental          | 14 |
| 6.11 General                | 14 |
