

eriss research summary

2004–2005

KG Evans, J Rovis-Hermann,
A Webb & DR Jones (editors)

Australian Government

**Department of the Environment and Heritage
Supervising Scientist**

It is SSD policy for reports in the SSR series to be reviewed as part of the publications process.

This SSR is a summary of the 2004–05 research program of the Environmental Research Institute of the Supervising Scientist and has been reviewed internally by senior staff and the editors of the volume.

Kenneth G Evans – Environmental Research Institute of the Supervising Scientist,
GPO Box 461, Darwin NT 0801, Australia.

Jacqui Rovis-Hermann – Office of the Supervising Scientist, GPO Box 461, Darwin NT 0801,
Australia. (Current address: Department of Employment & Workplace Relations, 11th Floor, QV1
Building, 250 St George's Terrace, Perth WA 6000, Australia)

Ann L Webb – Office of the Supervising Scientist, GPO Box 461, Darwin NT 0801, Australia.

David R Jones – Environmental Research Institute of the Supervising Scientist, GPO Box 461,
Darwin NT 0801, Australia.

This report should be cited as follows:

Evans KG, Rovis-Hermann J, Webb A & Jones DR (eds) 2006. *eriss research summary 2004–2005*.
Supervising Scientist Report 189, Supervising Scientist, Darwin NT.

Contents

Preface	ix
PART 1: RANGER – CURRENT OPERATIONS	1
Development of a contaminant pathways conceptual model for Ranger mine	5
R van Dam & P Bayliss	
Preliminary assessment of bioaccumulation and trophic transfer of key metals from Ranger mine	9
R van Dam, C Sauerland, K Turner, C Humphrey, B Ryan & A Bollhöfer	
Influence of calcium on the ecotoxicity of magnesium: Implications for water quality trigger values	15
R van Dam, A Hogan, C McCullough, C Humphrey, S Nou & M Douglas	
Chronic toxicity of uranium to the tropical duckweed, <i>Lemna aequinoctialis</i>	20
R van Dam, S Nou & A Hogan	
Development of a reference toxicity testing program for <i>Chlorella</i> sp. and <i>Hydra viridissima</i>	24
A Hogan, R van Dam & S Nou	
Revision of the ecotoxicology laboratory manual	27
A Hogan	
Atmospheric radiological monitoring in the vicinity of Ranger and Jabiluka	28
A Bollhöfer, D Elphick & SA Atkins	
Monitoring of radionuclides in groundwater at Ranger	31
B Ryan	
Radon concentrations in air in the Alligator Rivers Region	32
A Bollhöfer & P Martin	
Introduction to SSD's stream monitoring program for Ranger, 2004–05	35
C Humphrey	

Chemical and physical monitoring of surface waters in Magela and Gulungul Creeks	36
M Iles	
Creekside monitoring in Magela Creek	40
C Humphrey, D Buckle & R Luxon	
Monitoring using macroinvertebrate community structure	43
C Humphrey, J Hanley, C Camilleri & A Cameron	
Monitoring using fish community structure	46
R Pidgeon & C Humphrey	
Fish communities in channel billabongs	48
C Humphrey, D Buckle & R Pidgeon	
Fish communities in shallow lowland billabongs	54
R Pidgeon, R Luxon & D Buckle	
Publication of protocols for SSD's stream monitoring program in Magela Creek and Quality Control and Quality Assurance of SSD's stream monitoring program	58
C Humphrey	
Review of the bioaccumulation monitoring program	60
C Sauerland, B Ryan, C Humphrey & D Jones	
Surface water radiological monitoring in the vicinity of Ranger and Jabiluka	63
C Sauerland, P Medley & J Sellwood	
Surface water transport of uranium in the Gulungul catchment	67
C Sauerland, K Mellor, D Parry & A Bollhöfer	
PART 2: RANGER – REHABILITATION	71
Reliability assessment of Siberia model outputs	75
KG Evans & GR Willgoose	

Assessing the geomorphic stability of the currently proposed final landform at the Ranger mine using landform evolution modelling	77
JBC Lowry & KG Evans	
Radio- and lead isotopes in sediments of the Alligator Rivers Region	80
A Bollhöfer & A Frostick	
Radon exhalation at and around Ranger uranium mine	83
C Lawrence, R Akber, P Martin & A Bollhöfer	
Development of predictive habitat suitability models of vegetation communities associated with the rehabilitated Ranger final landform	86
C Humphrey, I Hollingsworth & G Fox	
Key aspects of native flora seed biology that support Ranger mine rehabilitation goals	99
P Bayliss & S Bellairs	
Key aspects of native flora seed biology that support Ranger mine rehabilitation goals. Part 1: Seed biology of selected Australian native grass species	100
K Sangster & S Bellairs	
Key aspects of native flora seed biology that support Ranger mine rehabilitation goals. Part 2: Progress on Kakadu Native Plant Supplies Project	103
M Gardener, P Christophersen & S McGregor	
Bioaccumulation in traditional Aboriginal bushfoods	106
B Ryan, A Bollhöfer & P Martin	
Assess Quickbird data for weed mapping and monitoring at Ranger	110
K Pfitzner	
Quantify stream sediment transport characteristics for Gulungul Creek to assess the impact of mine site erosion and rehabilitation performance of Ranger mine	112
DR Moliere, MJ Saynor & KG Evans	

Feasibility study of implementation of sediment monitoring system in Corridor and Magela creeks upstream and downstream of Ranger mine	116
DR Moliere & MJ Saynor	
PART 3: JABILUKA	117
Monitoring during the care and maintenance phase at Jabiluka	120
M Iles	
Monitoring suspended sediment at Jabiluka 1998–2003: establishing baseline	123
KG Evans, DR Moliere, MJ Saynor, WD Erskine & MG Bellio	
Monitoring suspended sediment at Jabiluka: 2003–2005	127
DR Moliere, MJ Saynor & KG Evans	
Baseline stream channel stability characteristics in the Ngarradj catchment	130
MJ Saynor, WD Erskine, DR Moliere & KG Evans	
Gully initiation near the Jabiluka project area	134
MJ Saynor, WD Erskine, KG Evans & I Eliot	
Scour and fill in the Ngarradj catchment between 1998 and 2003	139
MJ Saynor, WD Erskine & KG Evans	
Cross-sectional changes in the Ngarradj catchment between 1998 and 2003	143
MJ Saynor, WD Erskine & KG Evans	
PART 4: NABARLEK	147
Vegetation monitoring techniques at Nabarlek mine site using remote sensing and ground-based studies	150
K Pfitzner	
Assess a variety of spatial, spectral and temporal scaled remotely sensed data for rehabilitation assessment	153
K Pfitzner	

Sediment and radionuclide fluxes from the former Nabarlek mine	157
GR Hancock, MK Grabham, P Martin, KG Evans & A Bollhöfer	
Assessing the geomorphic stability of the rehabilitated Nabarlek mine using landform evolution modelling	160
JBC Lowry, DR Moliere, GS Boggs & KG Evans	
Radiological impact assessment of the rehabilitated Nabarlek site	163
A Bollhöfer, B Ryan, P Martin & K Pfitzner	
PART 5: GENERAL ALLIGATOR RIVERS REGION	167
Mangrove response to environmental change, especially climate change	170
K Pfitzner	
Ecological risk assessment of Magela floodplain to differentiate mining and non-mining impacts	172
P Bayliss, R van Dam, J Boyden & D Walden	
Significant habitats and species in the Alligator Rivers Region	186
C Humphrey	
Radiological case study: South Alligator River	188
B Ryan, P Martin, A Bollhöfer & K Pfitzner	
RESEARCH CONSULTANCIES	191
Australia's tropical rivers – an integrated data assessment and analysis	192
R van Dam	
A preliminary ecological risk assessment of the impact of Ginger ants (<i>Solenopsis geminata</i>) on colonies of seabirds at Ashmore Reef	193
P Bayliss	
Climate change vulnerability of wetlands	194
I Eliot, MJ Saynor, K Pfitzner & M Eliot
