

Submission 'water trigger'

29/1/16

Dear Madam,

Water is life. This polluting madness has to stop!

Government MUST govern in the interests of the citizenry, not corporations.

The Narrabri Gas project by Santos in the Pilliga is an affront to farmers, ordinary citizens, and nature. and MUST not be approved.

Switch to renewables. The world thinks we're a joke, because our behaviour is flawed by golden handshakes and dirty subsidies.

Step up!

Thanks,

Theresa Mason
