Appendix A -Vertebrate Pests (Feral Species)

This is a full list of the feral vertebrates (sorted alphabetically by Common Name) that are potential pests on the offshore islands that were considered for the Top 100 high conservation status islands priority list.

* Denotes native species that were translocated or are considered self-introduced; some of these, such as Shark Bay Mouse, are conservation introductions, and where relevant, these species have been included as 'biodiversity value' in the conservation value assessment.

Appendix B - Biodiversity Value Listed Fauna

This is a full list of the threatened fauna species that were included in the biodiversity value component of the Australian offshore islands assessment. Species here are either listed under the Commonwealth of Australia's *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act), or under one or more Australian state/territory legislation. Relevant state/territory legislative acts referenced are: *Threatened Species Conservation Act 1995* (NSW); *Parks and Wildlife Commission Act* (NT); *Nature Conservation Act 1992* (QLD); *National Parks and Wildlife Act 1972* (SA); *Nature Conservation Act 2002* (TAS); *Flora and Fauna Guarantee Act 1988* (VIC); and *Wildlife Conservation Act 1950* (WA). Listing categories 'EPBC Status' and 'EPBC Category' are in keeping with fields used in DEWHA's Species of National Environmental Significance Database (DEWHA 2009e). For species that are not listed under the EPBC Act, EPBC Status is listed as 'Not Listed' and 'EPBC Category' contains the relevant state/territory conservation status listing.

This is not a comprehensive list of all legislation under which an individual species is listed. For state/territory listed species, it is possible that not all appropriate legislation is cited – for example, if a species is listed under the EPBC Act, we have not listed additional state/territory legislation under which that species is covered, since the EPBC Status has been used in the biodiversity assessment (see Methods, Chapter 2). Similarly, for EPBC listed Migratory or Marine Species, only one of the relevant listings is included for the purposes of the biodiversity assessment, but we acknowledge that many of these species are listed under more than one bilateral agreement (CAMBA, JAMBA and/or ROKAMBA), sometimes in addition to Bonn and Marine status. The purpose of this list is to provide a reference for the biodiversity value assessment used in this project, and for threatened species referred to in the report. Every effort has been made to ensure that species scientific names, common names and conservation status are correct and up to date at the time of this report preparation.

Key references used to determine species' nomenclature and conservation status are: Bryant and Jackson 1999; Clayton et al. 2006; DEC 2009a; DECC 2009; DEH 2009a; DEWHA 2009d,i; DPIPWE 2009; DSE 2009; EPA 2009; and NRETAS 2009.

Appendix C - Biodiversity Value Listed Flora

This is a full list of the threatened flora species that were included in the biodiversity value component of the Australian offshore islands assessment. Species here are either listed under the Commonwealth of Australia's *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act), or under one or more Australian state/territory legislation. Relevant state/territory legislative acts referenced are: *Threatened Species Conservation Act 1995* (NSW); *Parks and Wildlife Commission Act* (NT); *Nature Conservation Act 1992* (QLD); *National Parks and Wildlife Act 1972* (SA); *Nature Conservation Act 2002* (TAS); *Flora and Fauna Guarantee Act 1988* (VIC); and *Wildlife Conservation Act 1950* (WA). Listing categories 'EPBC Status' and 'EPBC Category' are in keeping with fields used in DEWHA's Species of National Environmental Significance Database (DEWHA 2009e). For species that are not listed under the EPBC Act, EPBC Status is listed as 'Not Listed' and 'EPBC Category' contains the relevant state/territory conservation status listing.

This is not a comprehensive list of all legislation under which an individual species is listed. For state/territory listed species, it is possible that not all appropriate legislation is cited – for example, if a species is listed under the EPBC Act, we have not listed additional state/territory legislation under which that species is covered, since the EPBC Status has been used in the biodiversity assessment (see Methods, Chapter 2). The purpose of this list is to provide a reference for the biodiversity value assessment used in this project, and for threatened species referred to in the report. Every effort has been made to ensure that species scientific names, common names and conservation status are correct and up to date at the time of this report preparation.

Key references used to determine species' nomenclature and conservation status are: Bryant and Jackson 1999; Clayton et al. 2006; DEC 2009a; DECC 2009; DEH 2009a; DEWHA 2009d,i; DPIPWE 2009; DSE 2009; EPA 2009; and NRETAS 2009.
